INTRODUCTION

Thank you for purchasing software from Econ Software. We are committed to provide THE VERY BEST of Shareware from around the world. Econ Software Publishing is an Associate Member of the Association of Shareware Professionals (ASP) based in U.S.A. We support the ASP's efforts to educate the public about the nature of Shareware distribution. We hope you'll find Shareware to be an effective method of obtaining computer programs.

The term Shareware describes a marketing method in which copyrighted programs circulate freely among users for the purpose of evaluation. This gives you the option to "Try Before You Buy". The author of a Shareware program typically allows you to try the program for up to 30 days before payment is required. The exact terms of evaluation vary from author to author, so be sure to check the documentation of the programs you evaluate.

The fee you pay to Econ Software Publishing is a distribution fee and does not cover the cost of the program itself. Programs which are used beyond the author's prescribed evaluation period require a separate payment to the author. By making payment to the author you obtain a legal right to use the software, and encourage the continued development of quality software within the Shareware channel.

The process of paying for Shareware is termed "registration". If you have problems contacting the authors for registration, do write in, and we will try to help you to register with them.

If you have a disk media failure and you get a message on the screen such as "Abort, Retry, Ignore", please return the damaged disk (the original copy) together with a screen print-out, your contact phone number and address to us for a FREE replacement.

We at Econ-Soft together with our distributers and dealers are dedicated to bring you the latest and the very best of shareware from around the world and will be constantly releasing 3 to 5 issues of new coverdisk software collections every month to fulfil your computing needs. We use the highest quality bulk disk, certified error-free for all our software. Together with our automated production facility and quality control, we will be able to ensure that our software will reach you at the lowest price in the highest quality and value possible. So, check up with your nearest computer dealers and leading bookshops for our latest releases every month.
